#### **Detailed Action**

### Response to Amendment

1. Applicant's amendment and accompanying Remarks filed 6-25-2003 have been entered and carefully considered.

The amendment is sufficient to overcome the obviousness rejections of claims 53-59 61-67,70-73 since claims 53-59 61-67,70-73 are cancelled without prejudice.

New claims 74-79 were added for consideration.

### Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claims 74-79 are rejected under 35 U.S.C. 103(a) as being unpatentable over US 4,286,007 to Oellerking in view of US 1,871,570 to Weber over the text substantially as set forth in the previous office action.
- 4. Claims 74-79 are rejected under 35 U.S.C. 103(a) as being unpatentable over US 1,871,570 to Weber in view of US 4,286,007 to Oellerking over the text substantially as set forth in the previous office action.

## Response to Arguments

5. Applicant argues that the relied on prior art combination fails to teach that a welding material extends across a portion of the width of the welding fabric,

Art Unit: 1764

wherein the welding portion is at each end of the welding fabric, and the welding portion is in the middle of the welding fabric. However, the claims do not exclude the possibility of a welding portion extending all the way across the welding fabric. The claims merely limit the presence of welding material over a part of the welding fabric. Examiner also notes that if Applicant intended to communicate that the welding portion is located ONLY on a part of the welding fabric, support in the specification for such a limitation has not been found.

#### Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office Action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
